

# Weekly Report

Yuxin Ma

09.10.2016 - 09.18.2016

## Projects

### Deep Learning for Visualization

This week I had a discussion with Wang Wei and formalized the research problems. Detailed information is sent via another email.

### Visual SVM Project

- **Query Projection View** This week the query projection view is connected into the system. Current result is shown in figure 1.

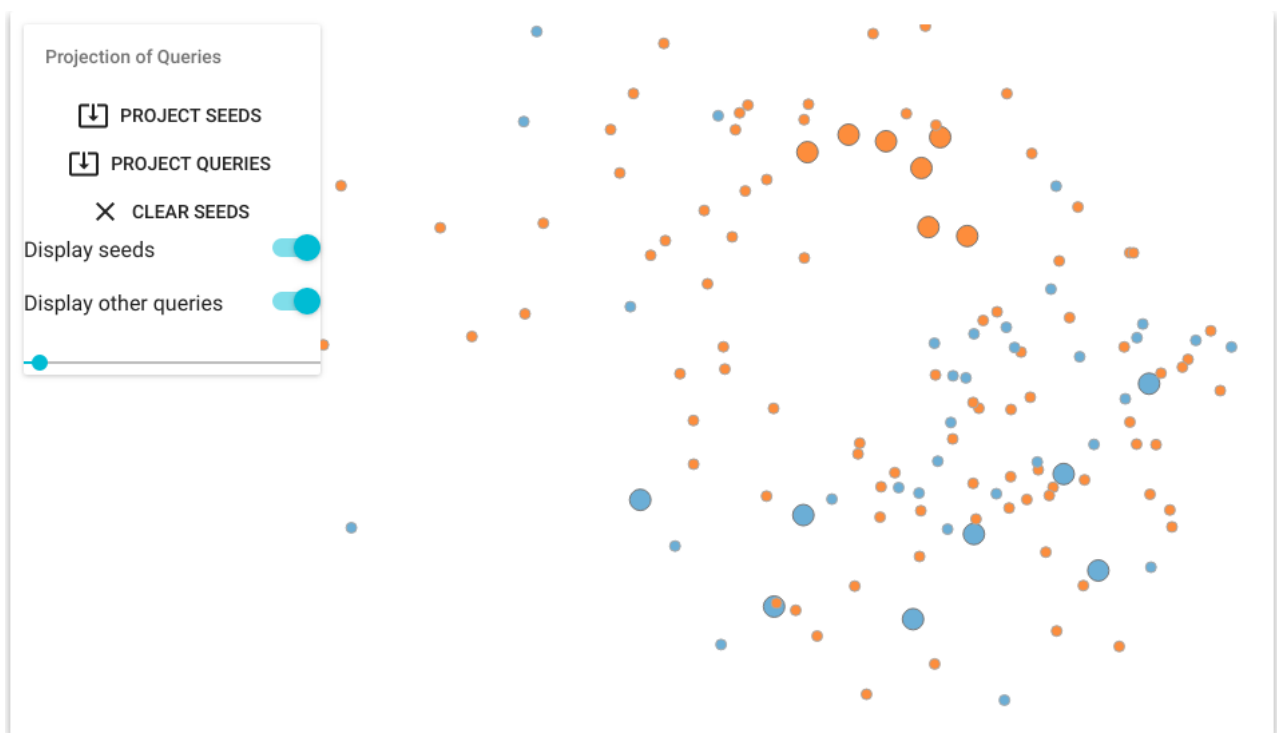

Figure 1: A snapshot of the query projection view.

### Plan for the Next Week

- Design and implement the glyphs of seeds and non-seeds in the query projection view;
- Organize the design of color schemes and coordinated interactions;
- Begin writing a document of the current visual SVM project to organize the entire idea;
- Continue consolidating the deep learning project;

- Begin reading leaked VIS 2016 papers.
